Academic Qualifications

Year	Degree/Certificate	Institute	CPI/%
2023–2026	BCA	Birla Institute of Technology, Mesra	8.8/10
2023	CBSE (XII)	Rukmani Birla Modern High School	81%
2021	CBSE (X)	Rukmani Birla Modern High School	87%

Technical Skills

- **Languages:** JavaScript, TypeScript, Python, Java, C, SQL, PHP, HTML, CSS, MATLAB, R
- **Frameworks/Libraries:** React.js, Node.js, Express.js, Redux Toolkit, Tailwind CSS, Bootstrap, Firebase, Three.js, Three Fiber
- **Tools:** Git, WordPress, WooCommerce, Shopify, REST APIs, Sheets API, Resend API, LM Studio, Claude Code, Antigravity
- **Core Concepts:** Data Structures & Algorithms, DBMS, OOP, Software Engineering, Machine Learning, Data Analytics, NLP, Statistical Analysis, Data Visualization, Supervised/Unsupervised Learning, LLM Integration

Internships / Experience

- **SEO & Web Development Intern | SEOKart** (Jun’25–Jul’25)
 - Developed reusable, SEO-optimized UI components using **React, Next.js, Redux Toolkit, and Tailwind CSS frameworks**.
 - Worked on **Shopify/BigCommerce SEO modules** including meta tags, schema markup, and technical on-page optimization.
- **Full Stack Developer | Health Monk** (Aug’25–May’26)
 - Designed and customized an **Shopify** e-commerce website, built interactive frontend sections using reusable JavaScript blocks.
 - Built an animated waiting list landing page using **React.js** and **Three.js** for immersive user onboarding experiences online.
 - Integrated **Node.js/Python** backend with **Resend API** for automated discount code email delivery to the waiting list users.
 - Created APIs to sync user registrations with **Google Sheets** and store customer data in Shopify databases securely and efficiently.
- **Web Developer | International Finance Student Association (IFSA)** (Jun’25–Jul’25)
 - Developed the official IFSA event website using **WordPress, Divi Builder, HTML, CSS, and JavaScript** from scratch.
 - Integrated **Google Sheets API** for real-time event data synchronization and seamless cross-device compatibility support.

Key Projects

- **Digital Footprint Finder** (OSINT platform for tracking users’ digital exposure.)
 - Integrated **HaveIBeenPwned API** for email breach detection and **Phoneinfoga** for phone validation and reconnaissance.
 - Built Python microservices using **Sherlock** for username OSINT and **Puppeteer** for Yandex reverse image search workflows.
 - Designed on **MERN** architecture with secure processing and zero user-data storage for enhanced privacy protection systems.
- **Telegram Narrative Analyzer** (AI system for tracking narrative propagation across Telegram channels.)
 - Implemented semantic clustering using **Sentence Transformers** and **DBSCAN** for narrative grouping and contextual analysis.
 - Developed “patient zero” detection and integrated **Qwen LLM** to validate claims against trusted live RSS feeds sources online.
 - Created interactive propagation dashboards using **React** and **Node.js** for real-time narrative tracking and visualization analytics.
- **IShop** (E-Commerce Website)
 - Built a **MERN** e-commerce platform with product listings, cart, admin dashboard, and secure user authentication systems.
 - Designed **REST APIs** and **MongoDB schema** for scalable CRUD operations; integrated custom image upload pipeline.
